

SANDESH SAWANE

Mumbai, India | +91 8341897290 | sbsawane@gmail.com | [linkedin.com/in/sandesh-sawane](https://www.linkedin.com/in/sandesh-sawane)

PROFESSIONAL SUMMARY

Senior QA SDET with 4.5+ years of experience designing scalable test automation frameworks, API validation suites, and cloud-native quality infrastructure across distributed systems. Core expertise in Java, REST Assured, Selenium, Cypress, and Cucumber BDD, with hands-on delivery in Dockerized test execution, Kubernetes test pods, and automated CI/CD quality gates via Jenkins and GitHub Actions. Proven track record of spearheading test strategies across microservices and UI workflows, championing shift-left quality practices, and mentoring engineering teams to achieve high test coverage and zero-leakage production releases.

TECHNICAL SKILLS

Languages & Core Tech: Java, Python, SQL (MySQL)

API & Backend Testing: REST Assured, Postman, RESTful Web Services, JSON/XML Schema & Payload Assertions, Microservices Validation, Database Testing

UI & Automation Frameworks: Selenium WebDriver (Java), Cypress, Cucumber BDD (Gherkin), TestNG, Page Object Model (POM), Playwright, Parallel Execution

CI/CD, Cloud & Containers: Docker, Kubernetes (Test Pods), Jenkins, GitHub Actions, Maven, Git, SonarQube Quality Gates

Process & Test Management: Jira, Confluence, Distributed Systems Testing, Defect Root Cause Analysis (RCA), Chaos & Boundary Testing, Agile/Scrum ceremonies, Test Strategy & Planning

PROFESSIONAL EXPERIENCE

SDET Engineer (Senior Associate)

Apr 2025 – Jul 2026

Genpact

Mumbai, India

- **API & Distributed Systems Automation:** Architected robust backend and RESTful API automation suites using Java and REST Assured, validating high-throughput service transactions and reducing API regression cycles across microservices.
- **Scalable UI & BDD Frameworks:** Spearheaded modular POM-based test automation frameworks utilizing Java, Selenium, and Cypress integrated with Cucumber BDD, accelerating test authoring by 50% and slashing manual regression cycles by 90%.
- **Containerized CI/CD Quality Gates:** Designed and maintained continuous integration pipelines using Jenkins and GitHub Actions, packaging execution environments into Docker containers and orchestrating parallel test jobs on Kubernetes test clusters.
- **Quality Advocacy & Code Governance:** Championed testability in cross-functional Agile ceremonies, governing code reviews/PRs for framework reliability, enforcing SonarQube quality thresholds, and mentoring junior engineers on clean-code automation practices.
- **Defect Analytics & Observability:** Engineered Python data-pipeline automations to aggregate cross-service defect analytics and logs, cutting issue turnaround by 80% and providing real-time quality metrics to engineering leadership.

Senior Analyst (QA & Automation)

Jan 2022 – Apr 2025

Reach Local India

Mumbai, India

- **Resilience & Boundary Testing:** Executed chaos, boundary, and non-functional validation across integration layers, maintaining 100% scenario coverage and zero high-severity escape defects for mission-critical platforms.
- **Backend & Data Integrity Validation:** Conducted deep-dive root cause analysis across distributed identity and service sync architectures, writing complex SQL assertions to resolve data anomalies and ensure 100% payload integrity.
- **Process Standardization:** Authored engineering QA documentation, standardized automated reporting metrics in Jira, and developed reusable automation libraries adopted across QA pods.

Consultant / Co-Founder

Sep 2020 – Dec 2021

HBS Dental Care

Pune, India

- **Platform Quality Delivery:** Led end-to-end quality strategy, requirement traceability, and release verification for a cloud-based service platform, achieving a 40% reduction in workflow processing errors.

TECHNICAL PROJECTS & ENGINEERING POCS

Cloud-Native Containerized Test Harness: Designed an automated testing infrastructure utilizing Docker and Kubernetes pods with GitHub Actions and Jenkins pipelines, enabling isolated, parallel regression runs across microservice endpoints and dynamic document exporters.

Distributed Microservices & REST API Suite: Built an automated verification suite targeting cloud-hosted REST APIs with REST Assured (Java) and Postman, validating complex payload assertions, token-based authentication, and schema compliance.

EDUCATION & HONORS

National Institute of Technology (NIT), Warangal

Warangal, India

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

- **Genpact Bronze Award (2025):** Recognized for technical excellence and engineering impact in enterprise automation delivery.
